

Town of Clintwood
Residential Cross Connection Control Survey

In order to protect the water supply from being contaminated, we are conducting a survey to determine if there are any hazardous conditions that could affect our drinking water.

We appreciate you taking the time to complete this survey.

If you have any questions regarding this survey please contact:

Allen Taylor, Water Supervisor (276) 926-8204

The information provided is an accurate and current description of your water system at this address. Please print your information below and sign your name as confirmation of the person completing this survey and return to the Clintwood Town Hall.

-

The Town of Clintwood requires that vacuum breakers be installed on all outdoor faucets. These devices protect your water supply from becoming contaminated by any substance which might enter the water hose and flow back into you water system (i.e. fertilizer, herbicides, soap, etc.) Hose vacuum breakers can be purchased at most hardware stores or home and garden centers.
